PURI HEAL GLOW

Pink Booster with Intensive Nourishment for GLOWING skin

PURI HEAL GLOW was developed based on a deep understanding of skin tissue cell physiology, and is formulated to deliver all essential nutrients and supportive factors required for tissue regeneration.

15 functional peptides support the overall conditioning of the tissue, helping to create an optimal environment for effective tissue regeneration.

 **PDRN**
DNA-based regeneration biomaterial

 **19 Amino-acids**
Essential building blocks for regeneration

 **HA**
Creates a moisture environment for cell activity

 **15 Peptides**
Funtional peptides for soothing and balance

 **Hydrolyzed Collagen**
Hydrolyzed, Skin-identical collagen

 **8 Vitamins**
Conditioning and collagen-elasticin synthesis

Benefits

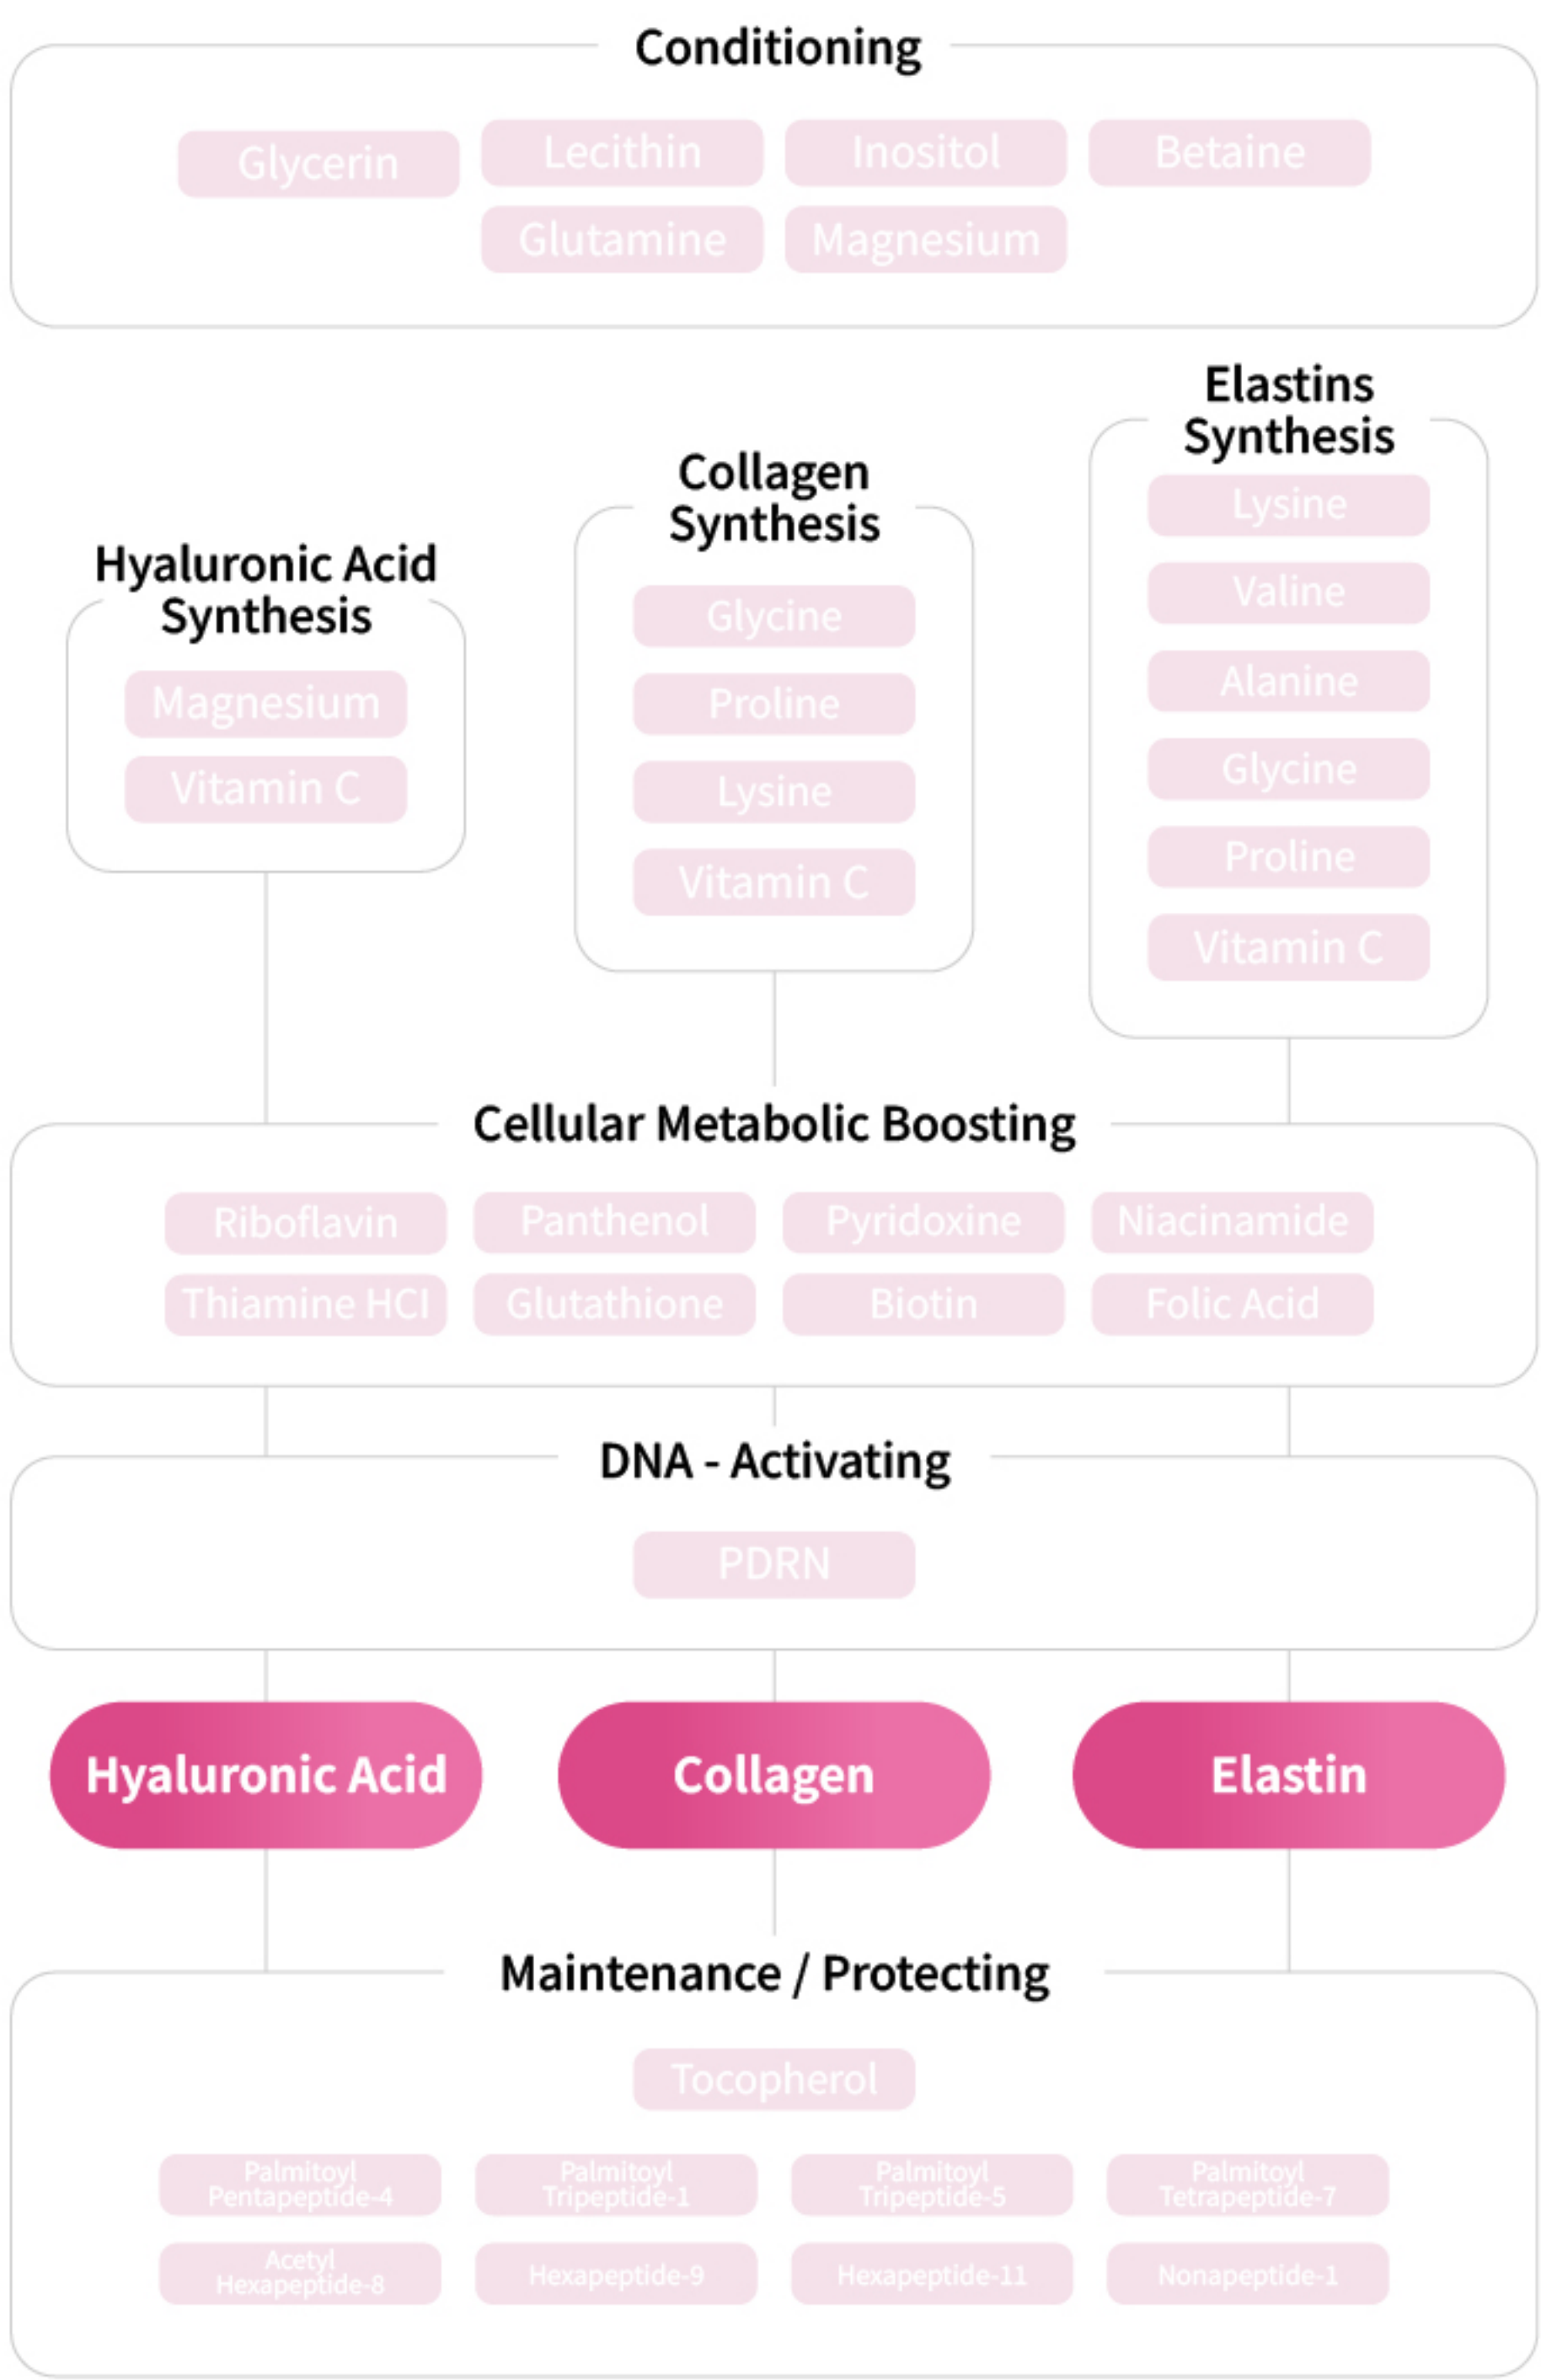

Why PURI HEAL GLOW ?

Tissue regeneration cannot be achieved if even a single essential nutrient is missing.
Based on in-depth research into the mechanisms of
Conditioning - Regeneration - Maintenance & Protection,

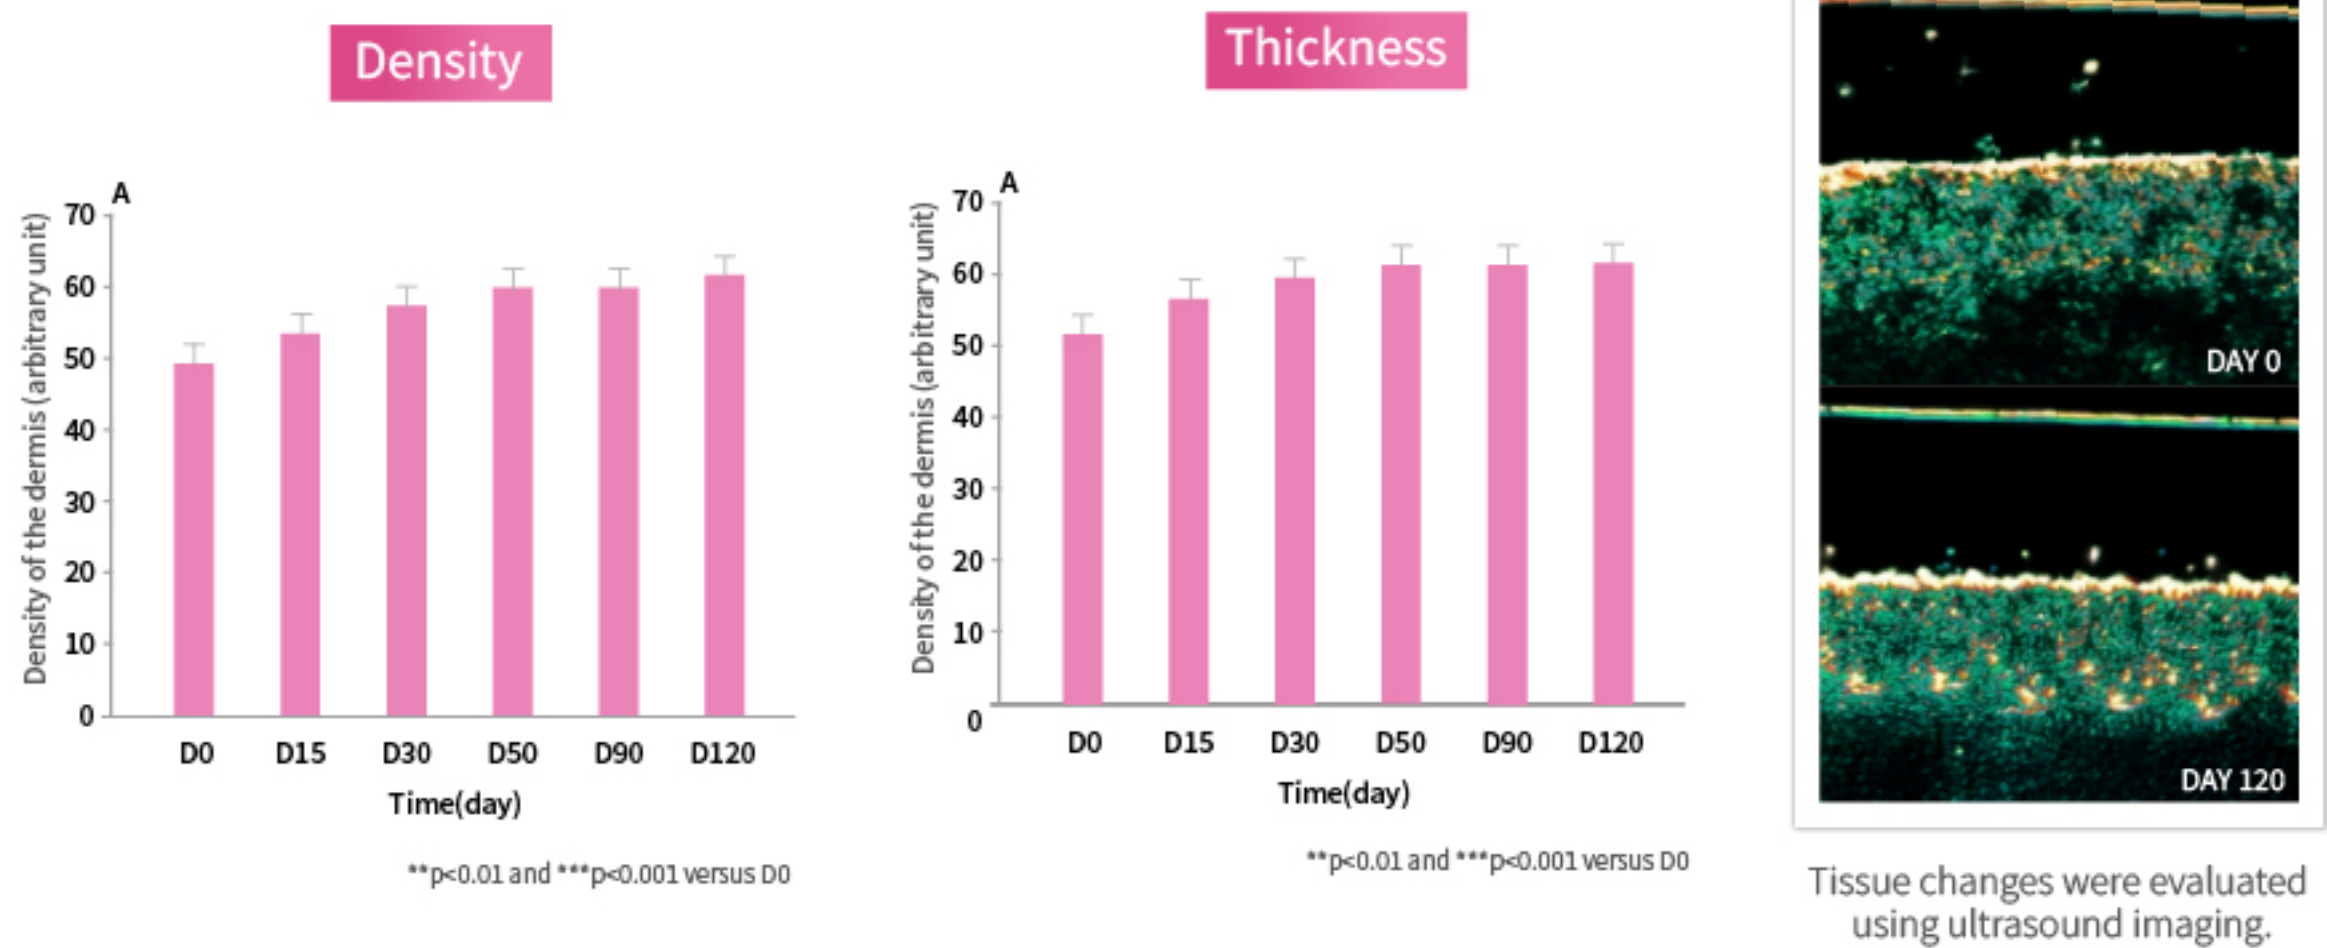

“Delivering every essential nutrient the tissue requires
without omission.”

This principle represents the most fundamental philosophy of tissue regeneration,
and it is the core value upheld by PURI HEAL GLOW.

How Effective Is PURI HEAL GLOW ?

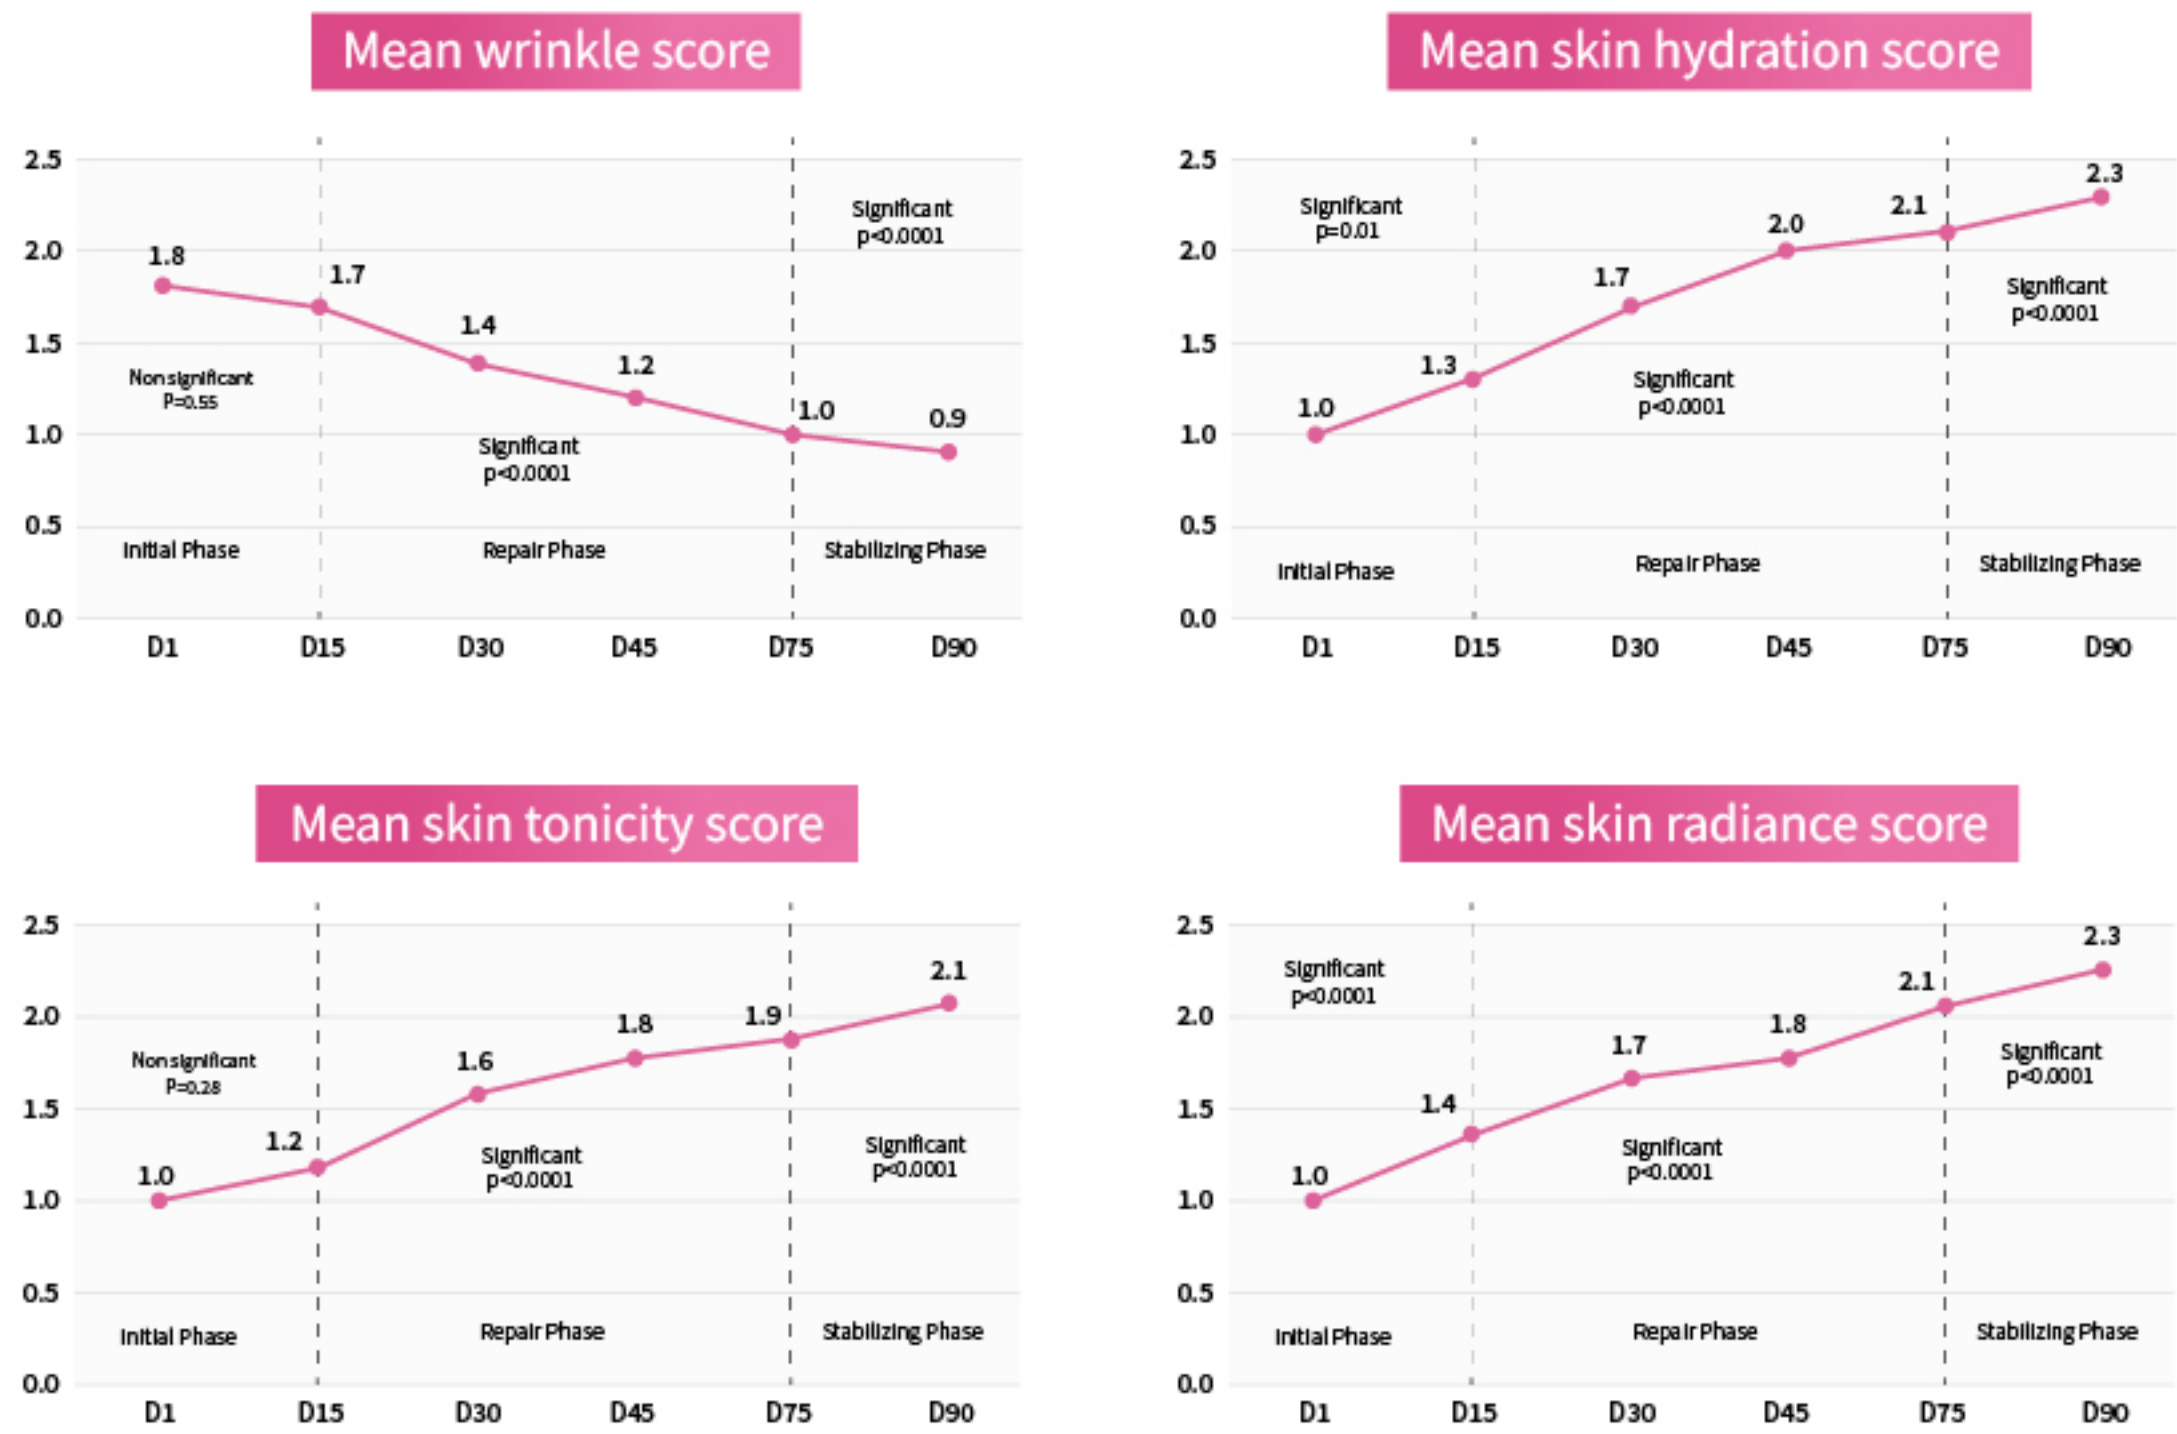

■ Increase in Dermal Thickness and Density

After 30 days (after the second session), measurable increases in dermal thickness and density were observed. These improvements were maintained for up to 120 days, correlating with clinically perceived improvements in skin firmness and elasticity.

■ Four-Stage Assessment of Skin Tissue Improvement

Using a U225 automatic injector, PURI HEAL GLOW was administered via point-to-point or nappage technique. Skin structure recovery—related to collagen and elastin regeneration—was evaluated by measuring both the epidermis and dermis across four parameters over a 90-day follow-up period.

Across all four parameters, statistically significant improvements were observed.

AETERDERM®

PURI HEAL LUCENT

Multi-functional Tone-up Booster for **Brightening**

PURI HEAL LUCENT is a scientifically designed tone-up booster solution that targets the four key stages of melanin activity production · transfer · oxidation · deposition to help achieve clear and translucent skin.

Based on skin conditioning and a regenerative environment, the formula is systematically built by pairing full-spectrum melanin defense ingredients into a structured, balanced formulation.

4 Tone-up Boosting Ingredients

18 Amino-acids

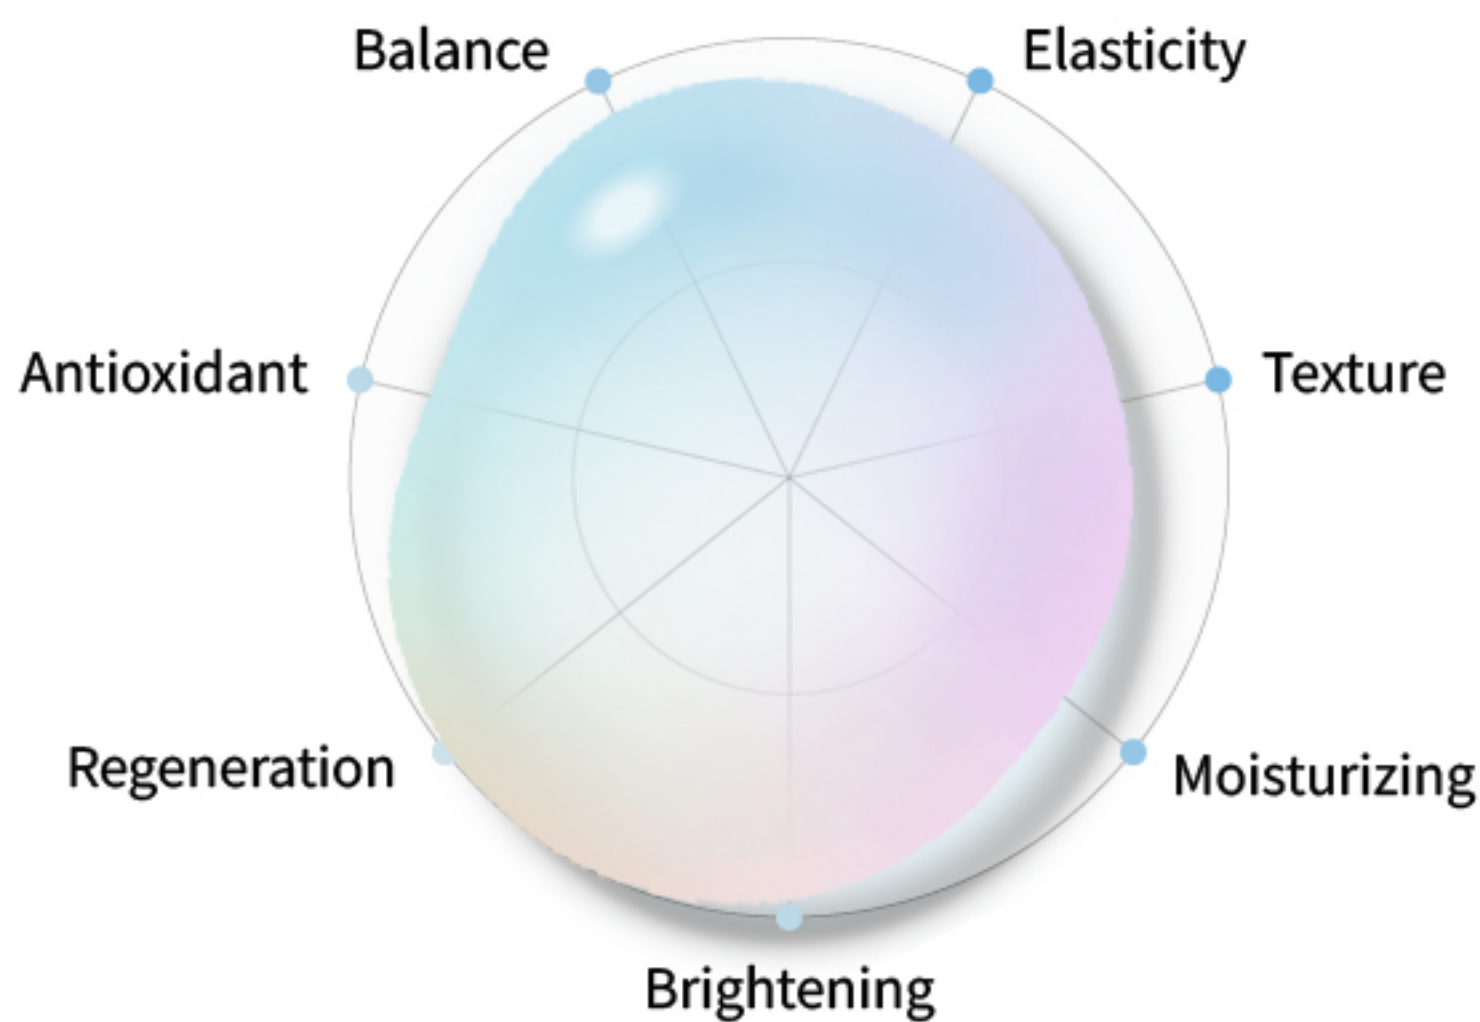

Essential building blocks for skin tissue regeneration

9 Vitamins

A vitamin complex supporting brightening

Benefits

Why PURI HEAL LUCENT ?

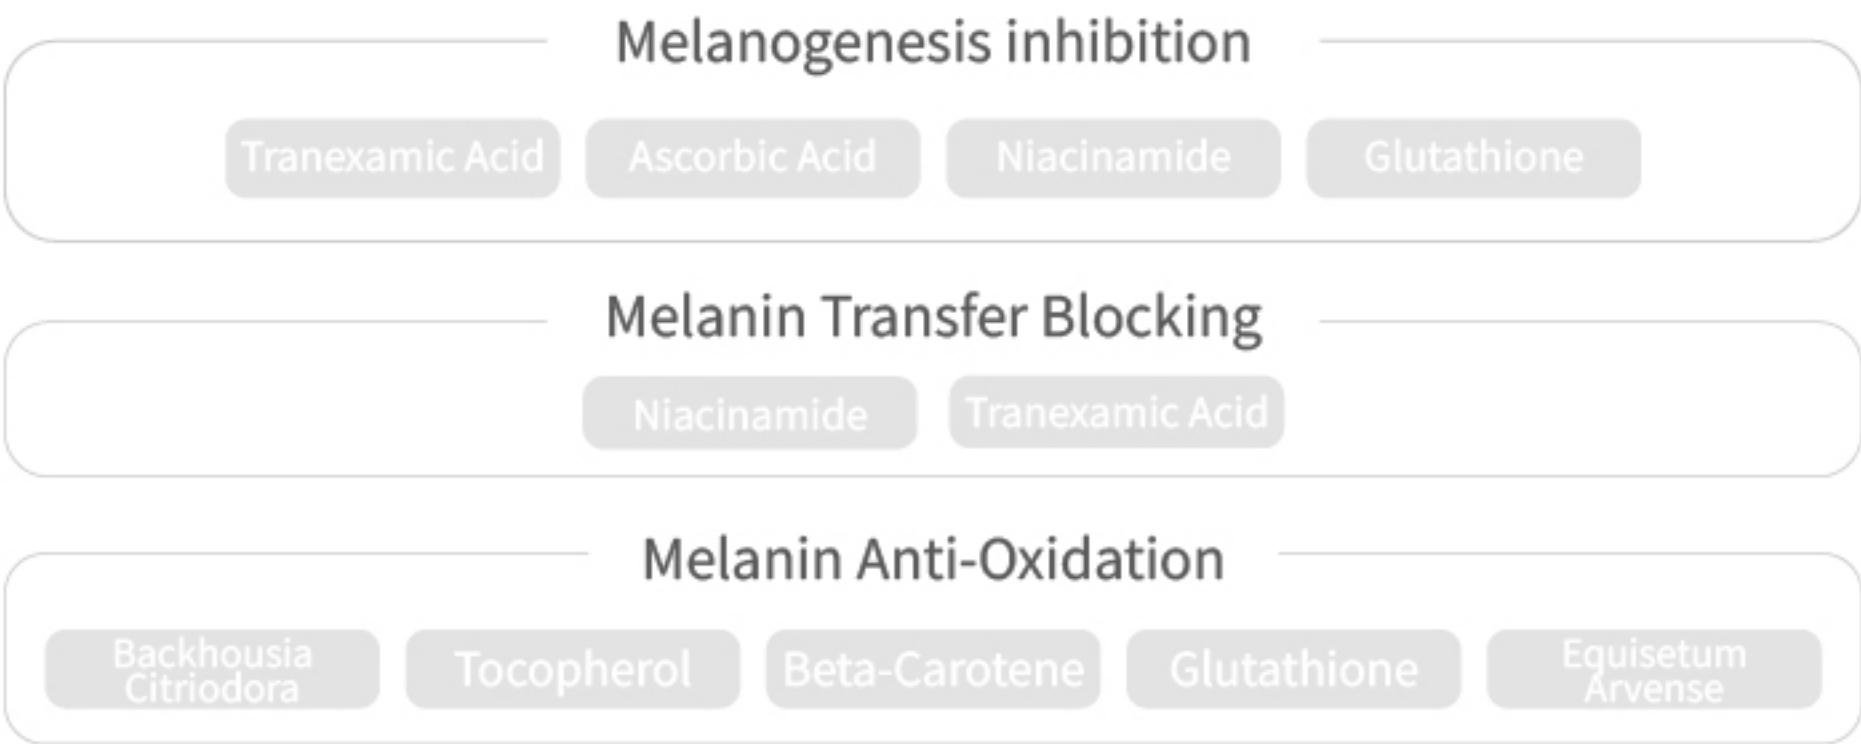

Skin brightening, when poorly balanced, often leads to irritation.
When a formula focuses solely on "whitening,"
skin stressed by irritation may respond defensively by producing even more melanin over time.

PURI HEAL LUCENT is built with conditioning and regeneration factors
that help protect the skin from the potential side effects of brightening ingredients.

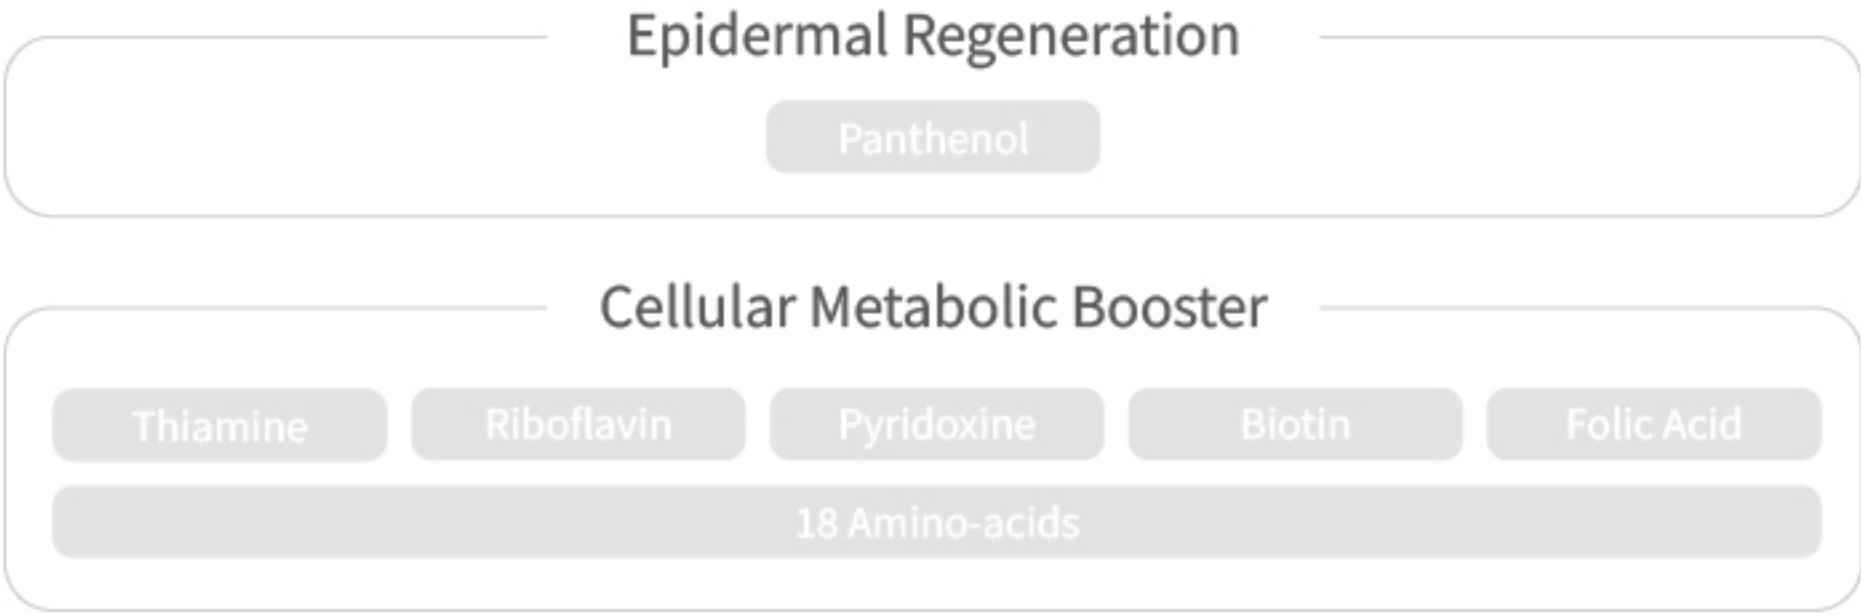

“Counterbalanced 1:1 — Brightening Without Compromise.”

This precisely matched 1:1 formulation delivers a high level of completeness and stability.

Full-Spectrum Melanin Defense

Melanin Clearance through Skin Renewal

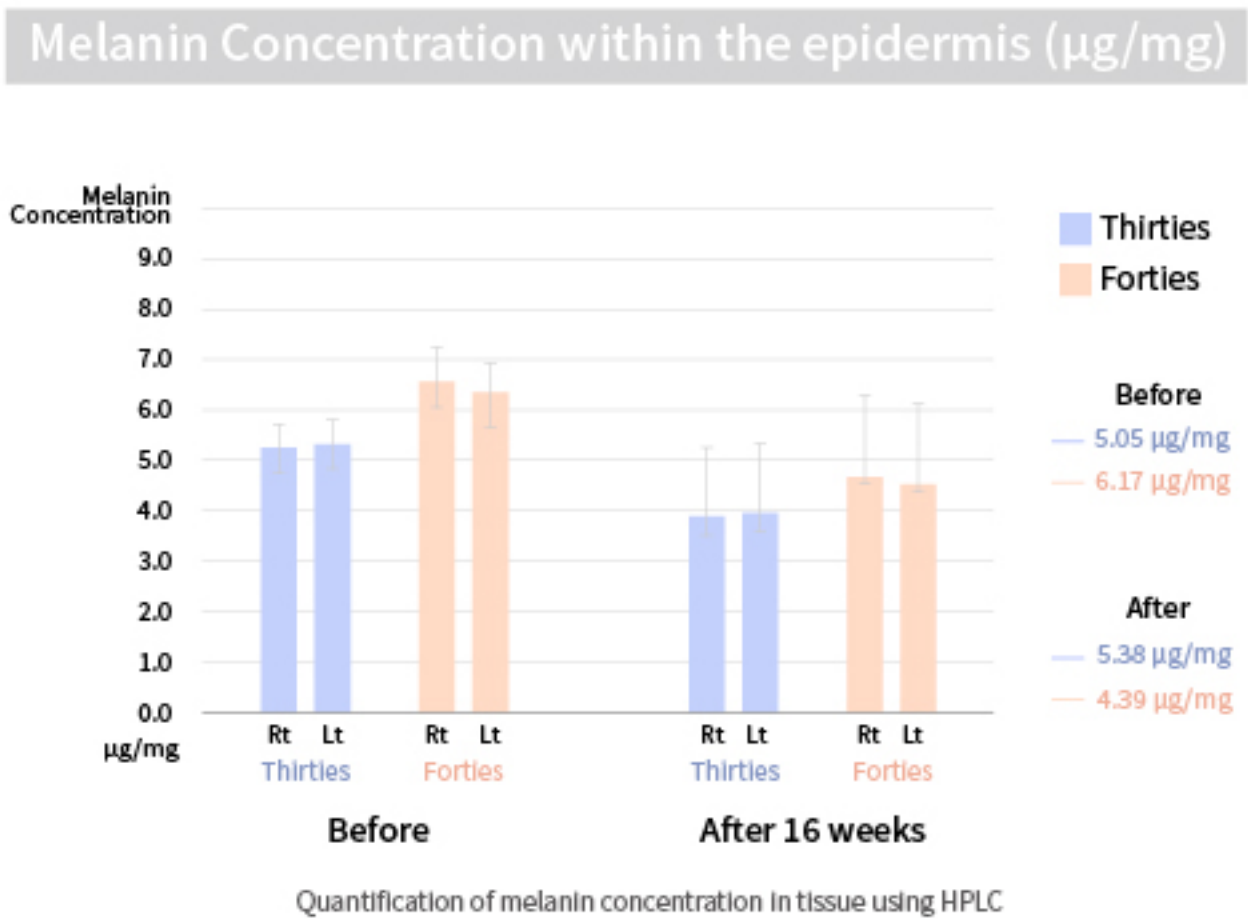

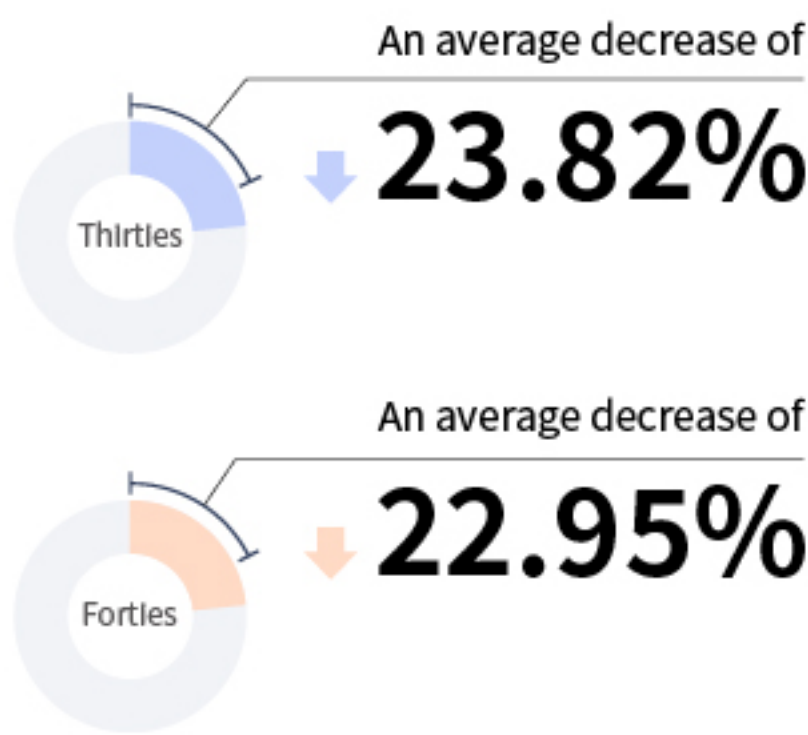

Conditioning for Melanin Control

How Effective Is PURI HEAL LUCENT ?

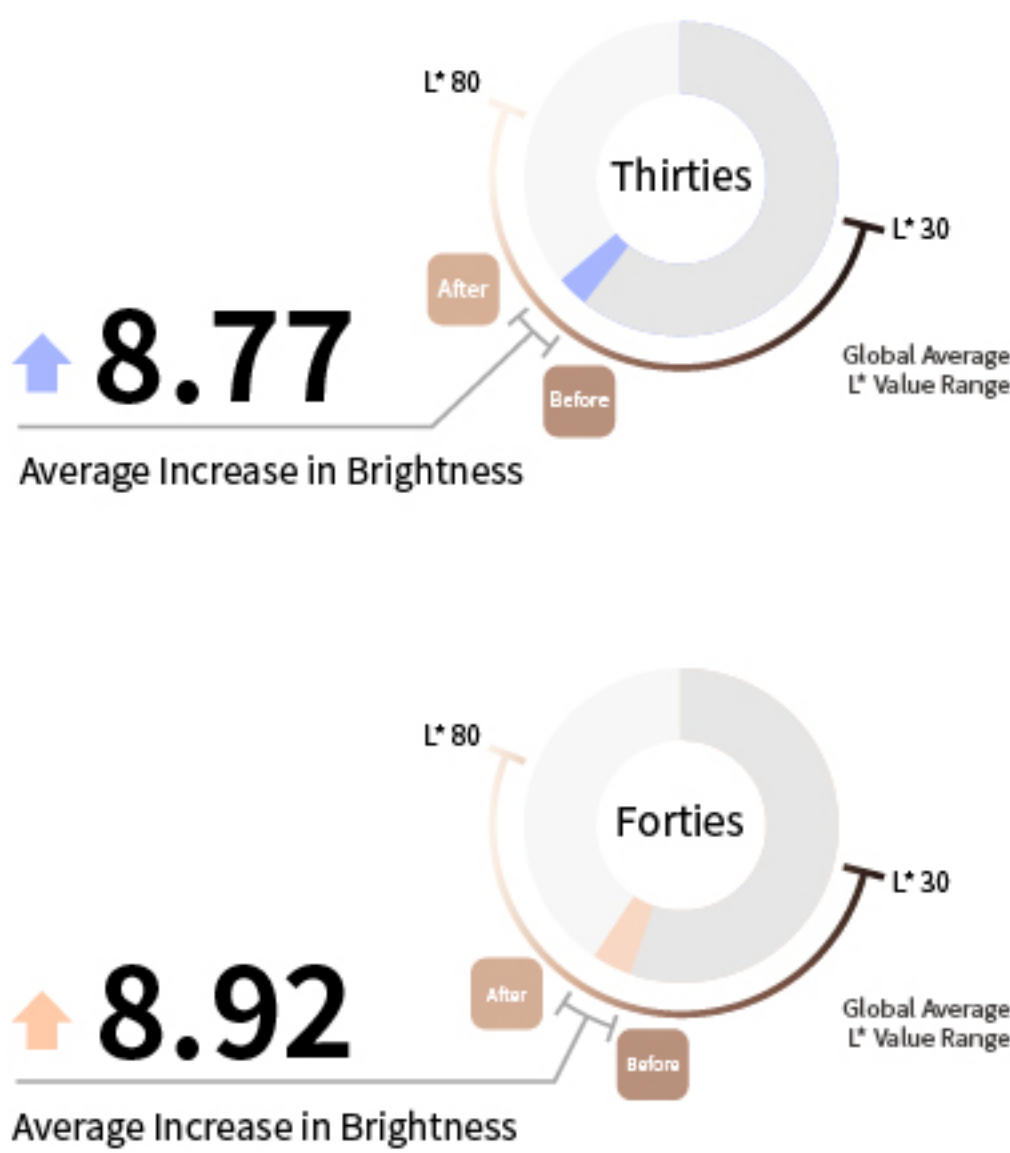

Reduction in Melanin Density

After meso injection of PURI HEAL LUCENT, subjects in their 30s and 40s showed a measurable reduction in epidermal melanin levels after 16 weeks, as confirmed by Fontana–Masson staining of epidermal and dermal tissues.

Across both age groups, an average 22–23% reduction in melanin density was observed, indicating that PURI HEAL LUCENT contributes to visible skin brightening at the epidermal level.

Measurement of Skin Brightness Improvement

Skin brightness (L* value) was measured using a colorimeter, quantifying the increase in visible skin brightness after treatment with PURI HEAL LUCENT.

AETERDERM®

PURI HEAL REVITAL NAD+

Cellular Metabolic Boosting Solution for Revitalization

Emerging as a core factor in modern cellular energy science, NAD+ and NMN form a powerful anti-aging formula designed to defend against the fundamental mechanisms of cellular aging.

NAD+

An essential factor for cellular energy production

Trehalose

Next-generation functional moisturizing agent

NMN

A key precursor involved in NAD+ biosynthesis

PDRN

DNA-based regeneration biomaterial

Succinic Acid

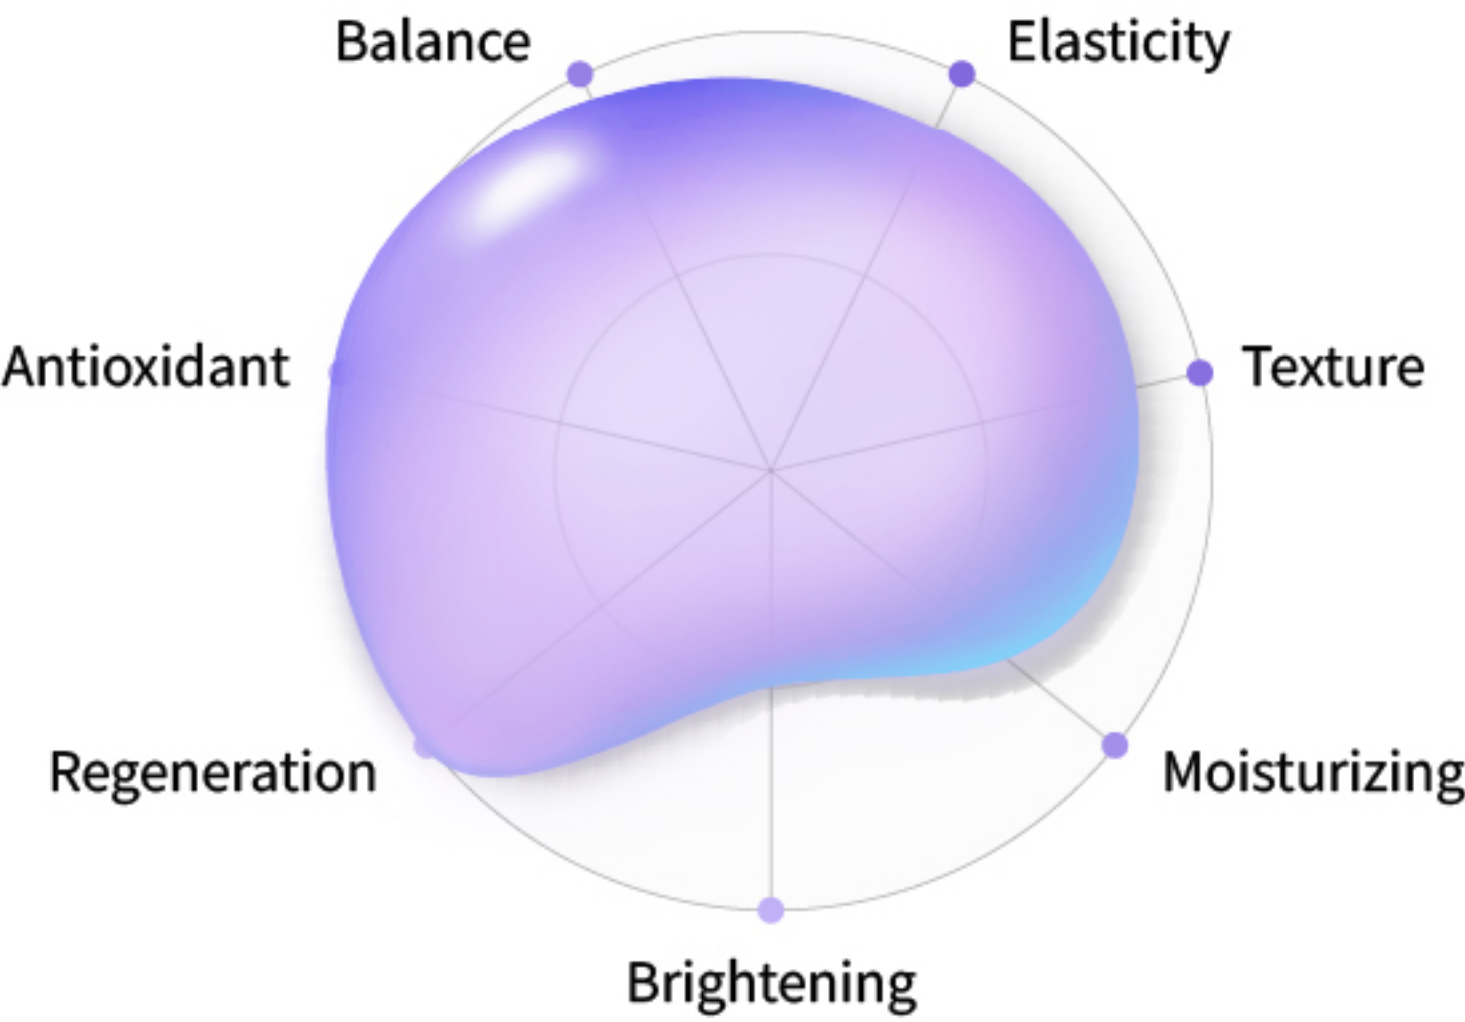

Supports cellular energy metabolism and recovery

18 Peptides

Funtional peptides for soothing and balance

Benefits

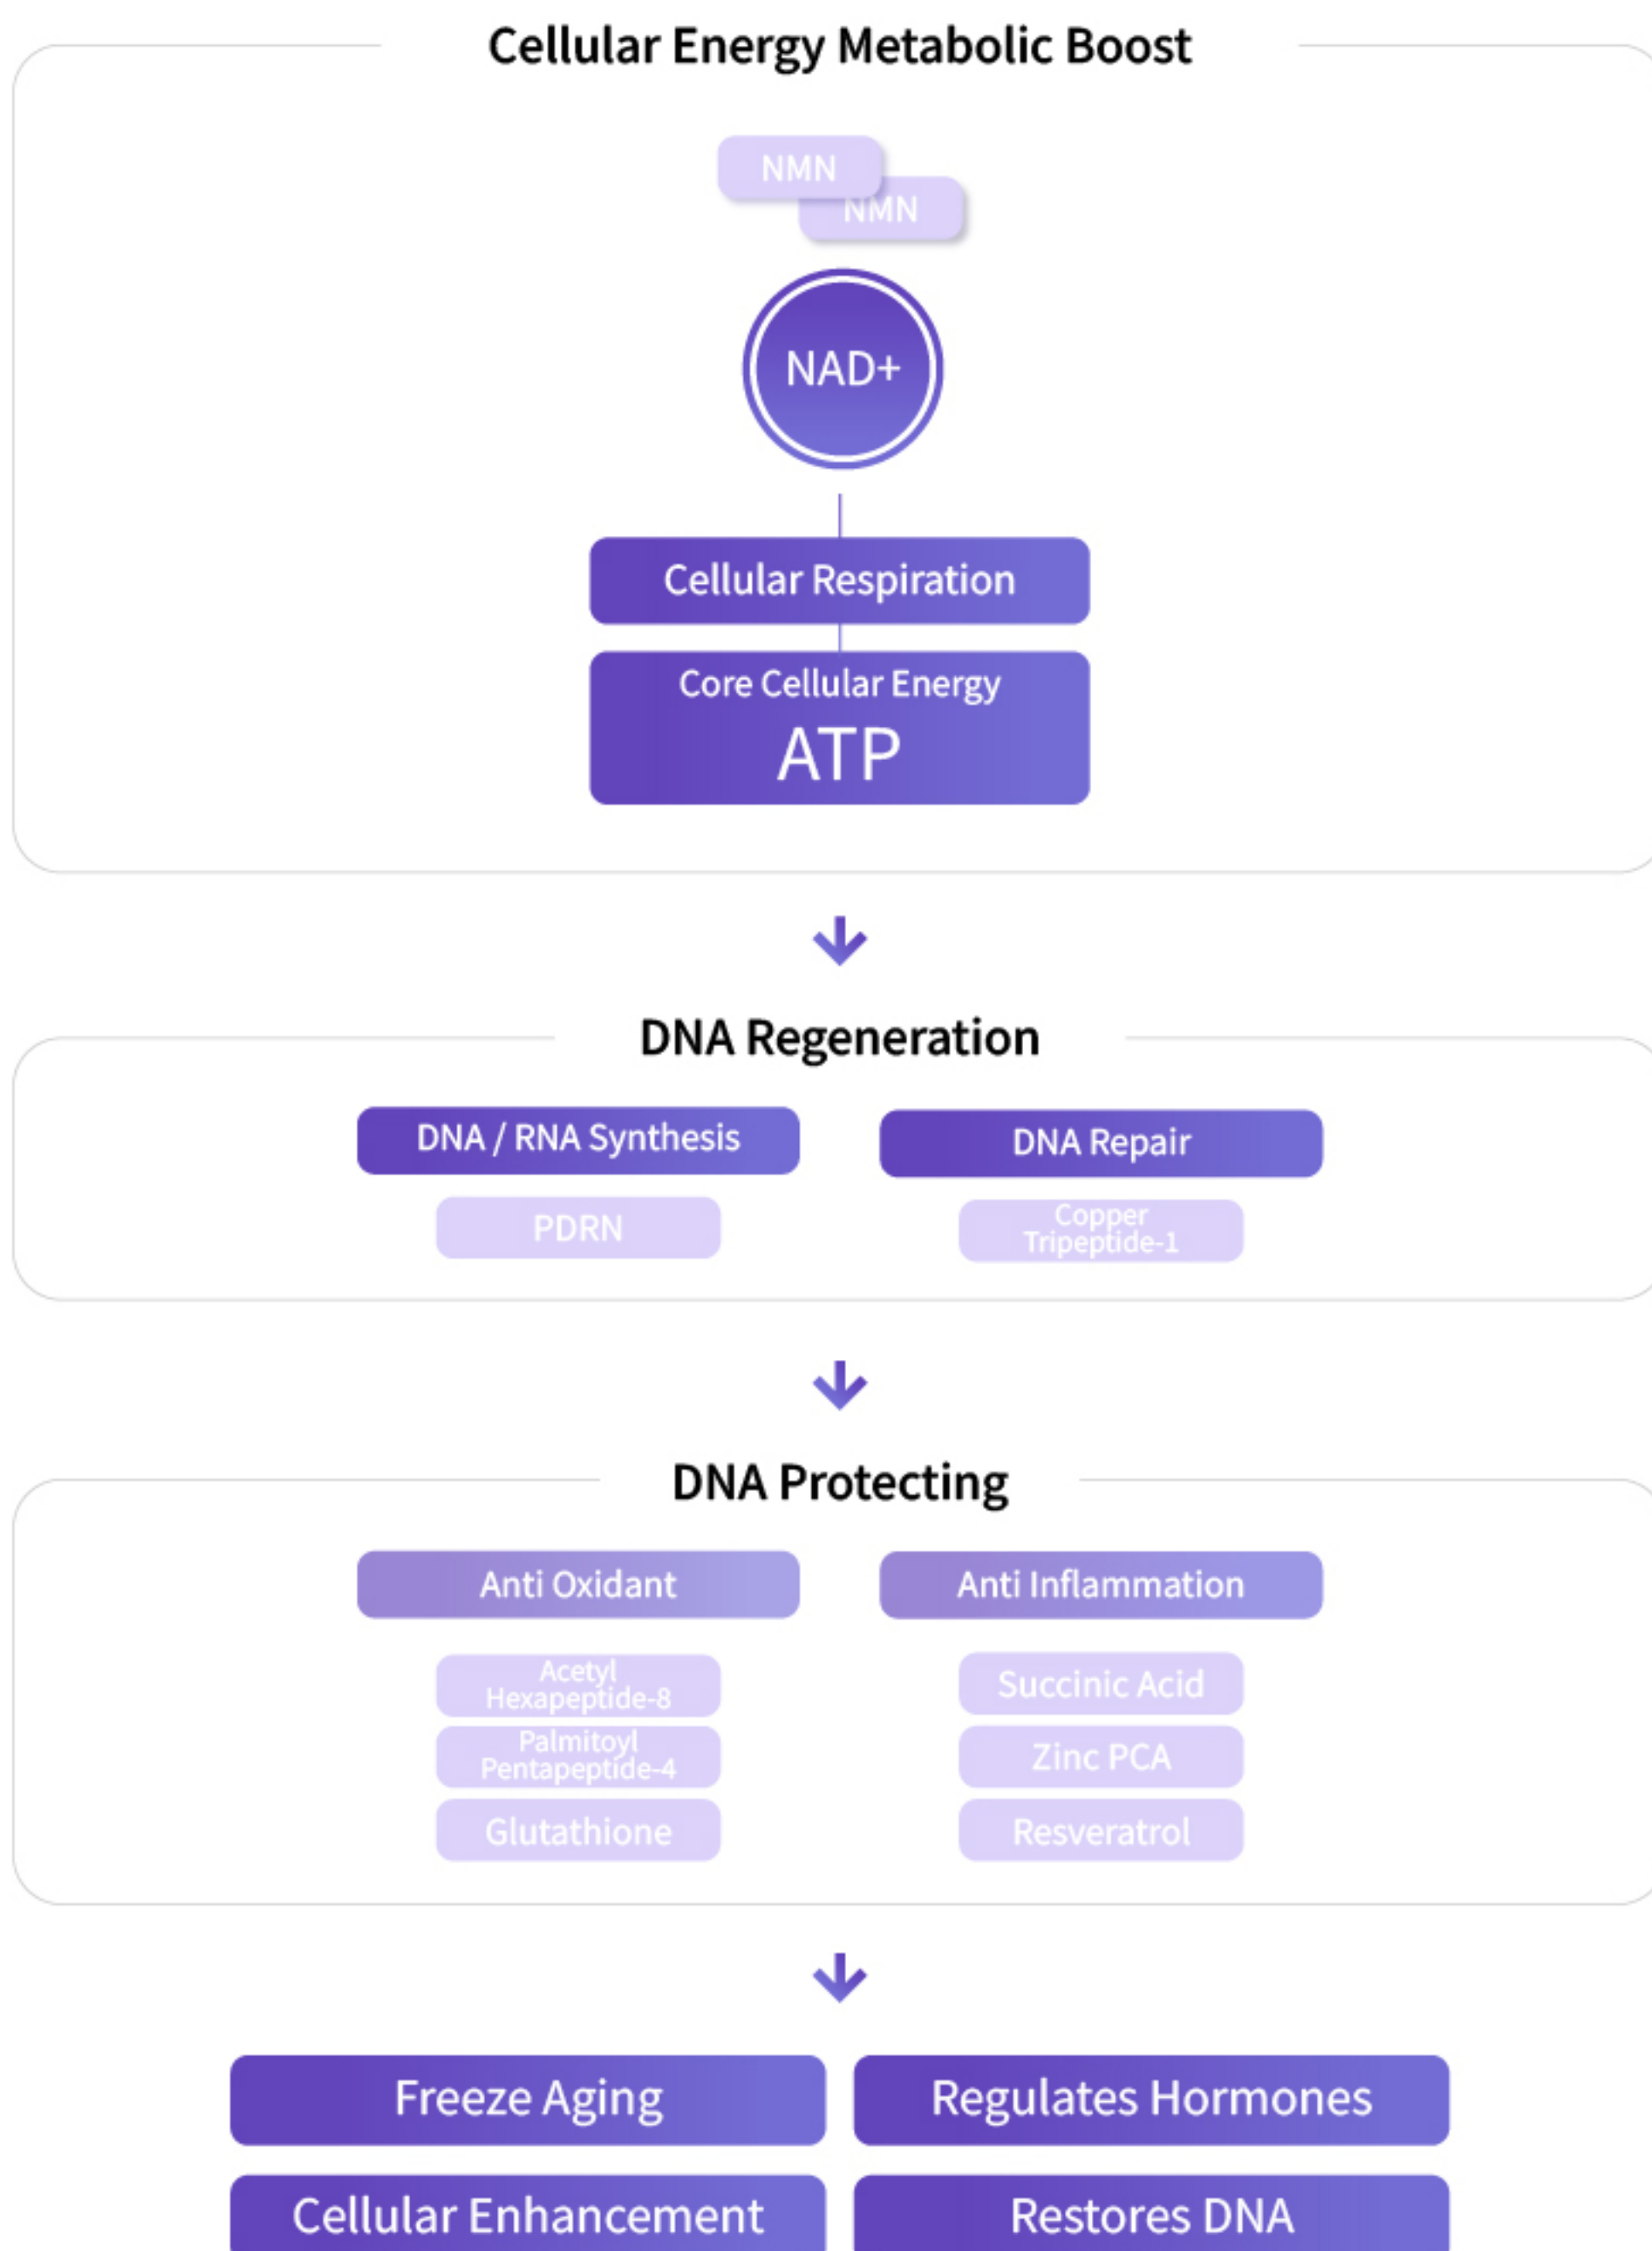

Why PURI HEAL REVITAL NAD+ ?

PURI HEAL REVITAL NAD+ fundamentally promotes mitochondrial metabolism to generate cellular energy, thereby focusing on activating the core DNA / RNA-driven mechanisms of tissue regeneration as a long-term effect solution.

By improving the fundamental mechanisms of cellular activity, it can serve not only to enhance the efficacy of PURI HEAL GLOW and PURI HEAL LUCENT, but also to amplify the mechanisms of all other types of skin boosters—acting as a true

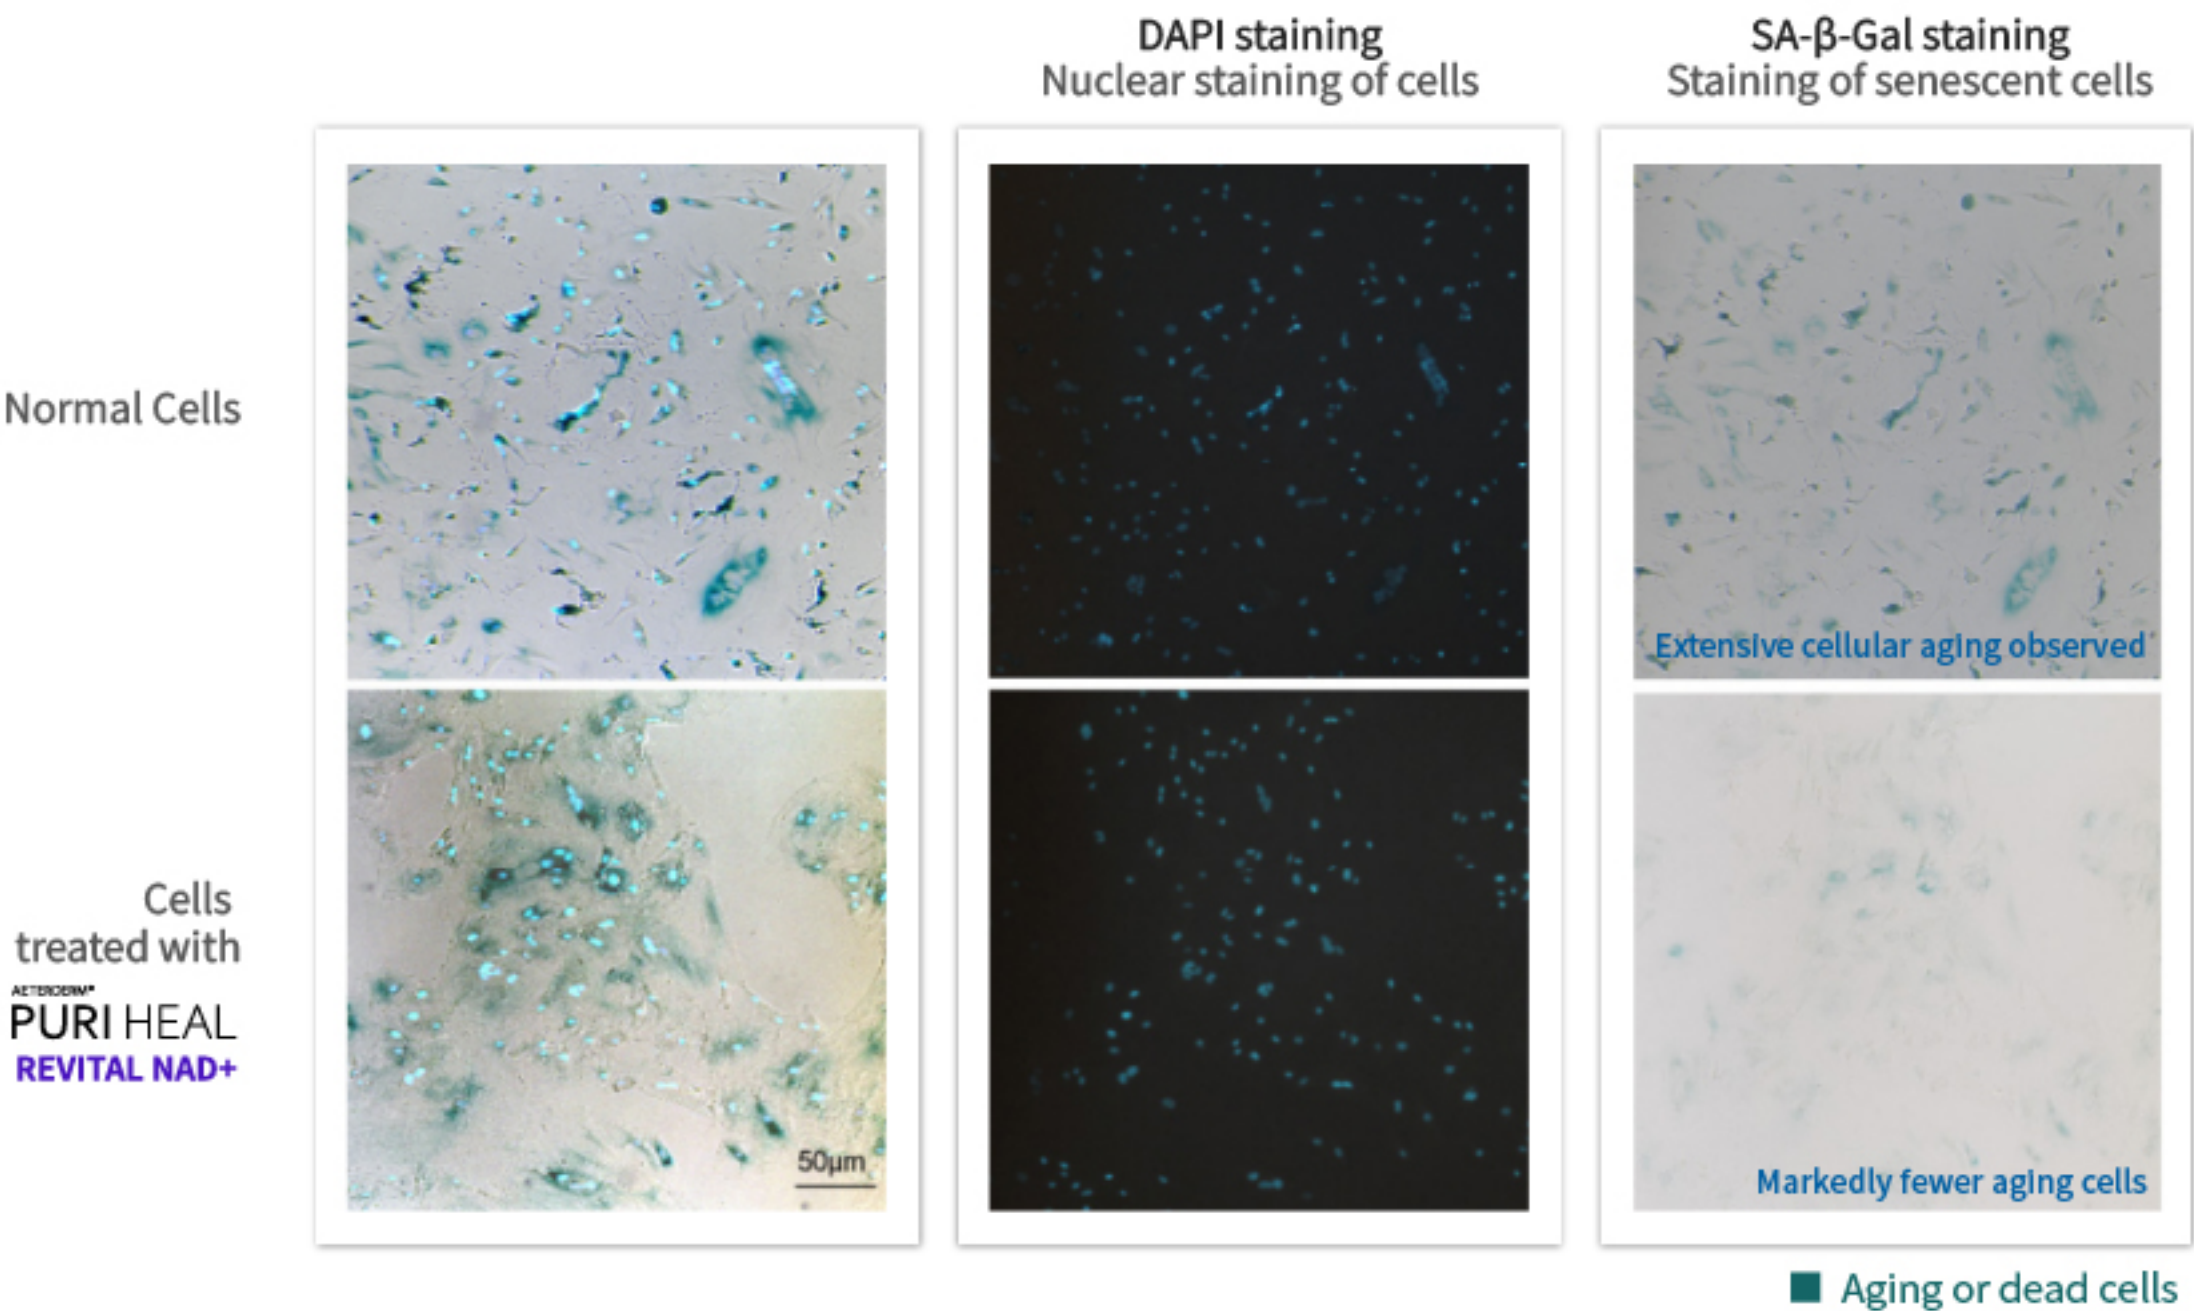

“Booster of Skin Boosters”

How Effective Is PURI HEAL REVITAL NAD+ ?

Improvement in Cellular Aging Progression

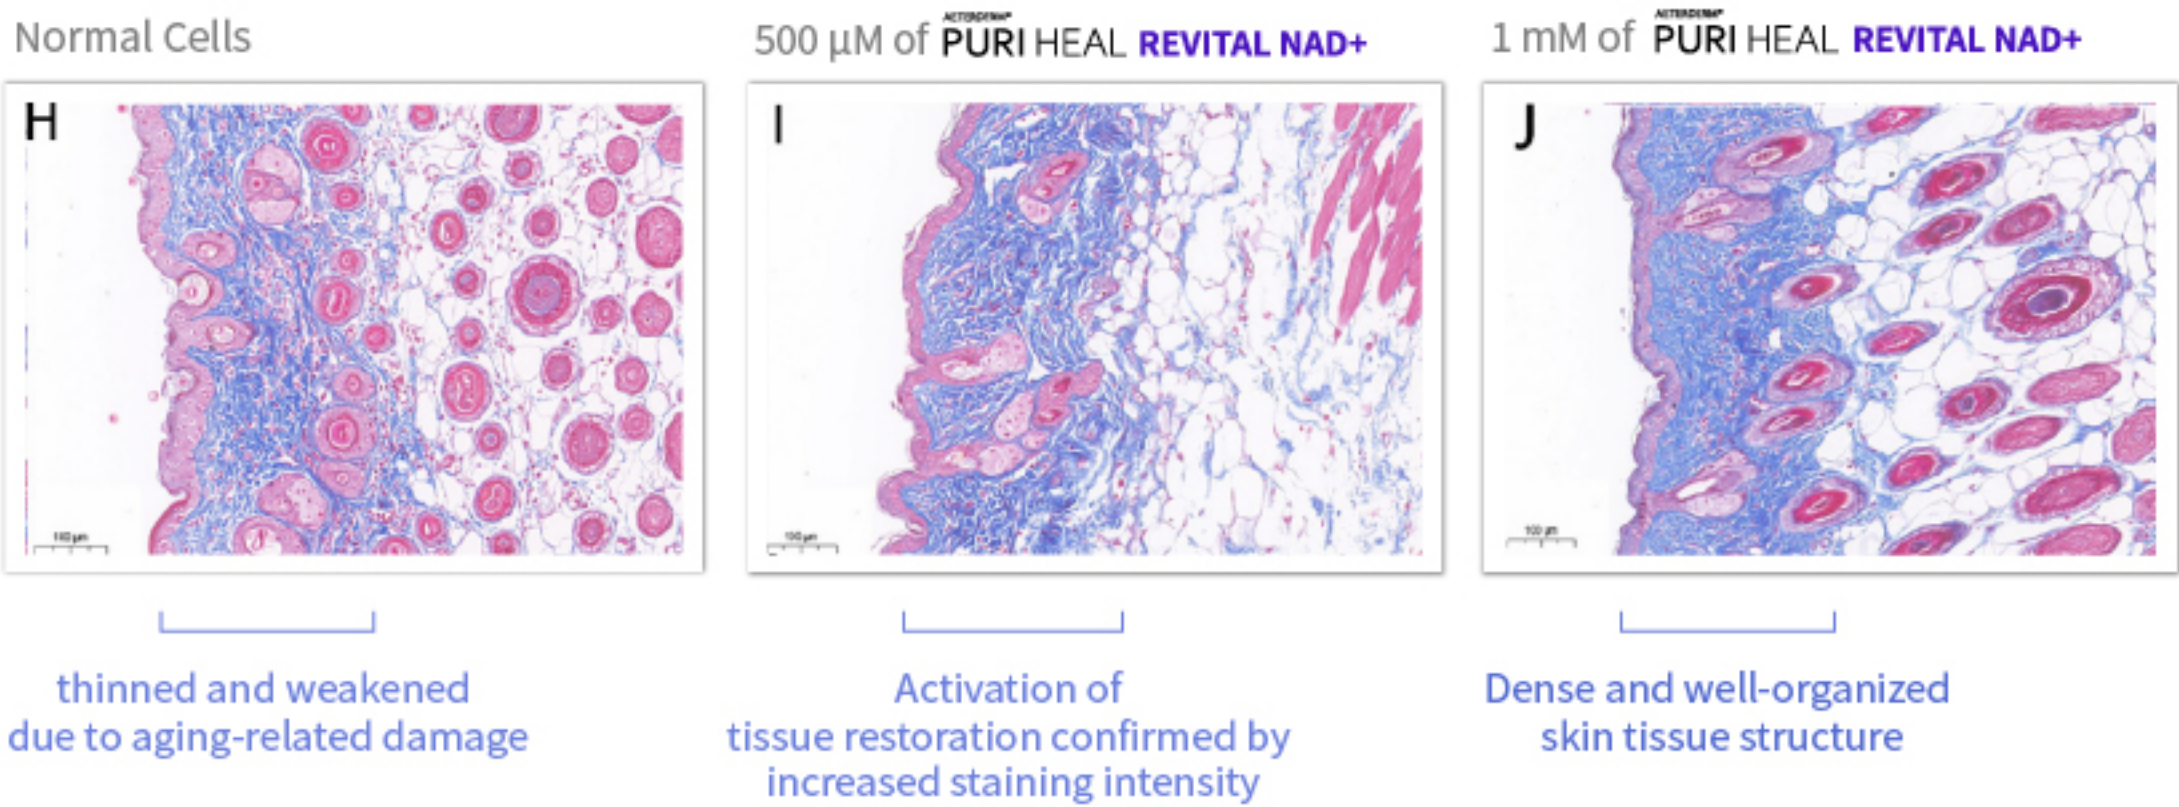

After isolating skin tissue cells, the cells were treated with PURI HEAL REVITAL NAD+, and cellular aging was evaluated using SA-β-Gal staining, a marker of senescent cells.

In cells treated with PURI HEAL REVITAL NAD+, senescent cells were rarely detected during SA-β-Gal staining, indicating a marked reduction in cellular aging progression.

Measurement of Skin Tissue Restoration

Using Masson’s Trichrome staining, skin tissue samples were observed under optical microscopy to evaluate the degree of tissue restoration following treatment with PURI HEAL REVITAL NAD+. Denser tissue structure and deeper staining indicate healthier, more resilient skin tissue.

Skin tissues treated with PURI HEAL REVITAL NAD+ demonstrated visibly enhanced restoration from aging-related damage in a dose-dependent manner.

PROTOCOL OPTIONS

SINGLE - FOCUS COURSES

HYBRID SYNERGY COURSES

COURSE SEQUENCING PROTOCOL

For those seeking rapid brightening within a short period

UP-GLOW
Hybrid Course

3-month
maintenance

LUCENT
Focus Course

For those aiming to improve tone-down and elasticity caused by aging

FULL SYNERGY
Course

6-month
maintenance

FULL SYNERGY
Course

For thin skin with easily reduced elasticity

PINK NAD+
Hybrid Course

5-month
maintenance

GLOW
Focus Course

For long-term management to slow the progression of fundamental aging

REVITAL NAD+
Focus Course

4-month
maintenance

Hybrid Course

For Enhanced Skin Rejuvenation Outcomes

3D Exosome & NAD+ Complex

An advanced synergistic booster solution developed to complement PURI HEAL treatments and support optimal skin regeneration.
For detailed information on PURI HEAL 3D EXO+, please refer to the QR code.

※ Treatment frequency and intervals should be determined based on the patient's skin condition, sensitivity, and recovery progress.

ADMINISTRATION METHOD

Hand-on Techniques *32 ~ 34 Gauge Recommended

- Micro Papular (Nappage)

Device-Assisted Delivery

- Meso Gun / Injector Gun
- MTS (Microneedling)

Energy-Based Combination

- RF Needling (Secret RF, Potenza, Sylfirm X etc.)
- Fractional Laser (CO2 / Er:YAG etc.) **PURI HEAL REVITAL NAD+**

Aftercare & Support

- Non-Invasive Recovery Device (Cryocell, LDM, LED etc.)

AETERDERM®

PURITHEAL

AETERDERM®

PURI HEAL GLOW

Pink Booster with Intensive Nourishment for **GLOWING** skin

[Composition]

PDRN, HA, Hydrolyzed Collagen, 19 Amino-acids, 15 Peptides, 8 Vitamins, etc ...

[Packaging]

5.0 mL x 5 Vials

AETERDERM®

PURI HEAL LUCENT

Multi-functional Tone-up Booster for **Brightening**

[Composition]

Glutathione, Tranexamic Acid, Niacinamide, Ascorbic Acid, 18 Amino-acids, 9 Vitamins, etc ...

[Packaging]

5.0 mL x 5 Vials

AETERDERM®

PURI HEAL REVITAL NAD+

Cellular Metabolic Boosting Solution for **Revitalization**

[Composition]

NAD+, NMN, Trehalose, PDRN, 18 Peptides, etc ...

[Packaging]

5.0 mL x 5 Vials
